Federal Ecosystem Management
Its Rise, Fall, and Afterlife
James R. Skillen

“Ecosystem Management was supposed to offer public-land managers in the 1990s a new paradigm that resolved the tensions between preservationism and conservationism. But it has not done so, argues James Skillen in this carefully reasoned analysis, because it is not firmly embedded in the legal statutes regulating the national forests, grasslands, parks, and refuges.”—Char Miller, author of Public Lands, Public Debates: A Century of Controversy

“The book deftly weaves together the diverse ideas, forces, and initiatives that brought about this controversial paradigm shift in federal natural resource management, while also critically examining key successes and failures in public land policy.”—Robert B. Keiter, author of Keeping Faith with Nature: Ecosystems, Democracy, and America’s Public Lands

272 pages
(2127) $65.00 cloth

The Nation’s Largest Landlord
The Bureau of Land Management in the American West
James R. Skillen

“An excellent overview by an insightful historian of the role of the Bureau of Land Management in public land history from its inception after World War II through the first decade of the 21st century.”—William Rowley, author of The Bureau of Reclamation

“A masterful critique.”—American Historical Review

Presidents and the American Environment
Otis L. Graham, Jr.

“Sweeping in themes and strong in opinion, Otis L. Graham, Jr.’s book is quite valuable in opening the debate over how presidents have led, followed, or obstructed on key conservation and ecological challenges throughout our history.”—Martin V. Melosi, author of The Sanitary City: Environmental Services in Urban America from Colonial Times to the Present

“Graham deftly weaves the contextual and the personal to tell the story of the environment and the presidency—and presidents. Context matters, but does not determine. Biography matters, but doesn’t compel. Too bad voters, or candidates, so rarely place environmental management (or management at all) at the top of their lists of necessary presidential attributes. This book will cause readers to think.”—Christopher J. Bosso, author of Environment, Inc.: From Grassroots to Beltway

416 pages
(2098) $39.95 cloth

Before Earth Day
Karl Boyd Brooks

“An important, entertaining, and valuable book that will aid in our understanding of environmental law. Brooks is a wonderful writer. He avoids the jargon that plagues much legal scholarship, and he involves the reader in the fascinating stories that he so vividly tells.”—John Nagle, author of Law’s Environment

286 pages, illustrated

Winner of the Lynton Keith Caldwell Prize

Environment, Inc.
From Grassroots to Beltway
Christopher J. Bosso

"Bosso has written the definitive study of the evolution of the major national environmental advocacy organizations from their surge (or in some cases their resurgence) in the early 1970s to the present... This book is a must read for all those who seek to understand environmental policy and politics and the broader analytic principles that undergird the relationship of politics and public policy."

Acting for Endangered Species
The Statutory Ark
Shannon Petersen

“A lucid account of how the Endangered Species Act came about, why it generates such controversy, and what it holds for the future.”—Bruce Babbitt, former U.S. Secretary of the Interior
182 pages
(1556) $19.95 paper

The Governance of Western Public Lands
Mapping Its Present and Future
Martin Nie

“Nie’s provocative book exposes the underbelly of the prevailing legal-political framework—its strengths and weaknesses—and offers a constructive vision for reforming the system. A masterful and sure-handed treatment of contemporary public land policy.”—Robert B. Keiter, author of Keeping Faith with Nature
“Should be required reading for all students of public policy and land management as well as those who depend upon and care for our public lands.”—Mike Dombeck, former chief of the U.S. Forest Service and director of the Bureau of Land Management
382 pages, illustrated

Unlikely Environmentalists
Congress and Clean Water, 1945–1972
Paul Charles Milazzo

“Sets a new standard for the historical analysis of environmental policymaking in the U.S. Congress and adds significant new information to the traditional narrative by focusing on previously neglected champions of reform.”—Jeffrey K. Stine, author of Mixing the Waters: Environment, Politics, and the Building of the Tennessee-Tombigbee Waterway
